Problem 1: Given a string s, reverse the words of the string.

```python
def reverse_words(s):

    words = s.split(' ')

    reversed_words = words[::-1]

    reversed_string = ' '.join(reversed_words)

    return reversed_string

string = "Hello world"

reversed_string = reverse_words(string)

print(reversed_string)
```

```
                                              input
world Hello

...Program finished with exit code 0
Press ENTER to exit console.
